Created in 1985, Microïds is an international publisher of multi-platform video games based in Paris (France). Today, it represents Anuman Interactive's video game business in all its forms.

Managed by its creator Elliot Grassiano, Microïds keeps getting stronger and widens its large game catalogue with genres as varied as adventure, management, simulation and action. Through its adaptations of iconic titles such as "Syberia" or "Amerzone" on new supports or through its original creations ("Dracula 5: The Blood Legacy", "Haunted House Mysteries", "Monument Builders: Colosseum"...), today,

Microïds is present on PC, Mac, tablets as well as iOS and Android mobiles but also on Tizen (more than 20 titles are in progress), Xbox 360 or PS3 ("Syberia" 1 and 2).

Besides its heroes and heroines from original creations ("Syberia"'s Kate Walker, "Still Life"'s Victoria Mc Pherson...), Microïds also create new titles including other characters or authors from other media (comic books, cinema, literature...) such as Garfield, Lucky Luke or Agatha Christie.

Microïds is currently developing Syberia 3 scheduled for 2015, responding to many fans of this cult adventure game series (more than 3M sold) who have been waiting for more than ten years.
